MEMORANDUM FOR: Allen H. McCreight
Assistant Director
Records Management Division
Federal Bureau of Investigation

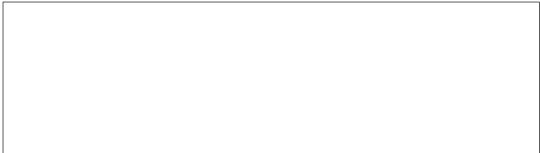

SUBJECT: Memorandum of Understanding - CIA/FBI
Tape Interface Program

1. It is understood that the current manual name checks submitted by the Central Intelligence Agency, Office of Security, to the Federal Bureau of Investigation, Records Management Division are searched against the current automated central index of the FBI and the inactive manual index.

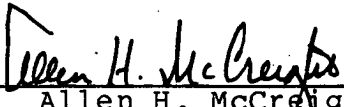

2. It is also understood that the current automated central index of the FBI contains, at a minimum, all documents selected for indexing out of criminal investigations from 1 January 1973 and from security investigations and other categories from 1 January 1958.

3. Data contained in the automated central index of the FBI meets the routine name check needs for those name checks submitted by the CIA, Office of Security. The Office of Security will, therefore, submit the majority of name check requests via automated magnetic tape submissions. It is also agreed that there may be exceptional cases whereby CIA, Office of Security may wish to have an extended search into the inactive manual indices. In those cases special requests will be submitted in hard-copy through normal liaison channels.
